SPRING FACTORY OPEN DAY

AK40

CARS FOR SALE

@AKSPORTSCARS.CO.UK

SPRING HAS FINALLY SPRUNG

So many of you have, like us, been tinkering with your AK cars over winter and have already had the first run out of 2024 over the Easter break. It feels GREAT to be back out and about after a long, wet & grey winter!

Tilly our AK427 demonstrator car is already working hard with plenty of visitors now coming along to AK HQ & doing many test drives for those starting their build journey.

Juniper & Antoinette our AK40 demonstrator cars are also doing plenty of test drives. Both having had a few winter tweaks, in preparation for both the AK Factory Open Day on Saturday 11th May and their trip to The Spa Classic in Belgium the following week.

The workshop have been busy creating an array of factory build cars. There is a special AK427 "Trebor", many of you have been following this build on our social media. He is due to be IVA tested later this month.

Another AK427 build "Money Penny" has begun & will be completed in July.

An AK40 build "Thunder" will be finished mid-summer, He will go to reside with his Sister, AK427 "Lightening" in Hong Kong.

So there is plenty to see & do keeping the AK Clan nice & busy!

AKD Update

BODY & CHASSIS ARE NOW MADE!

As, when creating anything new, this is where the fun begins!

The build concept, whilst not very different from that of our AKSS model car (In fact the chassis is 90% the same design). It still requires a degree of development to ensure that every part for the AKD will work where we need it, before we fit it to the car. We will keep you updated on the build progress of the first AKD.

We are now ready to take deposits for the first 5 AKD cars. These will be available as either self-build kits OR as full factory builds. Our target is to have body and chassis packages ready for Autumn 24 & Full factory built cars available for spring 2025.

We estimate the cost for the AKD will be in the region of £70'000 for a home build and around £110,000 for a fully factory built car.
